WORK IN SKINS

Worldwide Comparisons Exercise

Adapted from Teaching eHRAF Exercise 2.4 “Hide Working and Tanning Leather” by Christiane Cunnar
WORK IN SKINS

In this exercise, you will compare methods, materials, and tools used by societies across the world to work in animal skins.

EXERCISE DETAILS

TIME: 40 minutes

MATERIALS REQUIRED:

➤ HRAF Access
➤ Worksheet and pen or other materials for recording answers

STUDENT LEARNING OUTCOMES:

At the end of this assignment, you will be able to:

➤ explain and analyze cross-cultural differences in technology for working in skins across multiple culture groups
➤ describe the material traces left by various stages of work in skins
➤ analyze how technologies for work in skins reflect a culture’s access to different natural resources
➤ describe the social context of work in skins across multiple societies
➤ gain experience in team based secondary data collection and analysis techniques
➤ construct effective and efficient search strategies in eHRAF in order to retrieve data relevant to a specific topic/assignment.
METHODS OF WORK IN SKINS REVEAL ECOLOGICAL RELATIONSHIPS

The materials used for softening and preserving hides as well as dying them reflect a culture’s access to different natural resources.

Cultures located in coastal areas or in proximity to waterways, such as the Yakut of Siberia, often use fish products such as fish oil or fish liver as softening agents to process hides.

The Tarahumara of Mexico use tree products such as pulverized oak bark for tannins.
The Pawnee of the northern Plains (now Nebraska) use elm bark.

Toivo Immanuel Itkonen (1984) reports that the Saami in Northern Europe made red leather by using alder bark, mixed with ashes and warm water.
In groups of 5 members, have each individual select one word or term from the list below.

**List of agents used in hide work in and dyeing**

<table>
<thead>
<tr>
<th>Brains (from animals)</th>
<th>Fish</th>
</tr>
</thead>
<tbody>
<tr>
<td>Liver</td>
<td>Salt</td>
</tr>
<tr>
<td>Oil</td>
<td>Bark</td>
</tr>
<tr>
<td>Fat</td>
<td>Lime</td>
</tr>
<tr>
<td>Butter</td>
<td>Water</td>
</tr>
</tbody>
</table>
Each individual should now conduct an advanced search for OCM subject "work in in skins" in combination with the chosen terms from the list.

ASSIGNMENT PART 1

While researching their materials, each group member should fill in a data table, such as the following example.

**Cross-Cultural Use of Material X for Work in Skins**

<table>
<thead>
<tr>
<th>Society Name</th>
<th>How Material is Used</th>
<th>Special notes</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Society A</strong></td>
<td>➤ Applied to hides before tanning (Efuwozor 2016)</td>
<td>By women, in large groups of 40 (Dane 2016). Gathered by children (Ellis 2010).</td>
</tr>
<tr>
<td><strong>Society B</strong></td>
<td>➤ Applied to hasten the tanning process (Ellis 2010) ➤ Also used to soften leather (Cane 1990)</td>
<td>Applied by men, with tanning work done by women. Secretive process of acquiring it (Cane 1990).</td>
</tr>
</tbody>
</table>
ASSIGNMENT PART 2

As a group answer the following questions for each material. (5 minutes for each material)

**Question 1:** What common steps, access, or spaces are needed to acquire this material across multiple societies?

ASSIGNMENT PART 3

As a group select the two tables with the most detailed information about materials. As a group, discuss and answer the following questions for both materials.

**Question 2.** Is there a gender, class, age group, or population subset, most likely to be using this material? Explain. (5 minutes)

**Question 3.** What evidence would the harvesting and use of this material leave in the archaeological record? (5 minutes)
The Sioux Indian women of the Teton or Western Dakota tribe sustained and perpetuated village life using their agricultural and domestic skills. Among the Dakota women's many skills were porcupine quill work and bead embroidery. They also performed such essential tasks as dressing hides for clothing and shelter, caring for the children and cooking. Public Domain Image via Wikimedia Commons

RESOURCES

Assignment Rubric, Tips, References
The following rubric is suggested for evaluating responses:

<table>
<thead>
<tr>
<th>Assignment Part 1: Data Collection</th>
<th>Unsatisfactory (0%)</th>
<th>Needs Improvement (25%)</th>
<th>Satisfactory (75%)</th>
<th>Outstanding (100%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tables for material use in eHRAF are absent</td>
<td>Needs Improvement</td>
<td>Satisfactory</td>
<td>Outstanding</td>
<td>Tables for material use include multiple societies with a variety of notes and most include citations.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Assignment Part 2: Questions 1</th>
<th>Unsatisfactory</th>
<th>Needs Improvement</th>
<th>Satisfactory</th>
<th>Outstanding</th>
</tr>
</thead>
<tbody>
<tr>
<td>Answers are absent or mostly incomplete</td>
<td>Answers are only partially completed and/or inaccurate</td>
<td>Answers are paritally complete and refer back to table</td>
<td>Answers are almost entirely complete and refer back to table</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Assignment Part 2: Questions 1-2</th>
<th>Unsatisfactory</th>
<th>Needs Improvement</th>
<th>Satisfactory</th>
<th>Outstanding</th>
</tr>
</thead>
<tbody>
<tr>
<td>Major points are not clear. Specific examples are not used.</td>
<td>Commentary on research findings is not comprehensive and /or persuasive. Major points are addressed, but not well supported. Responses are inadequate or do not address topic or response to the questions Specific examples do not support topic or response to the questions.</td>
<td>Evaluation and analysis of research findings is accurate. Major points are stated. Responses are adequate and address the question at hand. Content is accurate. A specific example from the research is used.</td>
<td>Evaluation and analysis of research findings is accurate and persuasive. Major points are stated clearly and are well supported. Responses are excellent and address questions Content is clear. Several specific examples from the research are used.</td>
<td></td>
</tr>
