

HRAF Collection of Ethnography and eHRAF World Cultures Complete Collection List (February 2013)

This report contains information about HRAF's microfiche (and paper) and online versions of the Collection of Ethnography (the online version is now called **eHRAF World Cultures** -- <http://ehrafworldcultures.yale.edu>).

- The cultures are listed by major geographic region (Africa, Asia, Europe, Middle America and the Caribbean, Middle East, North America, Oceania, and South America) and by *Outline of World Cultures* (OWC) numbers within the regions.
- The report contains two lines for those cultures in both microfiche and eHRAF (see columns labeled eHRAF and Fiche).
- Differences between eHRAF and the microfiche/paper
 - Not all of the microfiche/paper collection is in eHRAF; we process about 40,000 pages a year
 - In the process of retrospective microfiche conversion we review the contents of the microfiche file; we add new material and sometimes remove material that is too difficult to process electronically or that is redundant or tangential.
 - Approximately 25-40% of each annual installment is new material not contained in the microfiche. Therefore you should expect that the information on time coverage, number of documents, and number of text pages per culture may differ in the electronic and microfiche collections
- Representative samples within the HRAF Collections of Ethnography
 - Probability Sample Files (PSF)
 - The 60-culture Probability Sample Files (PSF) is a subset of HRAF designed to ensure representative coverage of the traditional and peasant cultures of the world.
 - One well-described culture from each of 60 world regions was randomly selected for the PSF
 - Simple Random Sample (SRS)
 - We have also begun to add cases by simple random sampling (SRS) from a revised list of cultures (expanded from the *Outline of World Cultures*. See column labelled "SRS."
 - Some of these cases are new to the collection; those that are already in the collection were updated and converted from microfiche.
 - The new randomly added cases provide researchers with a second set of cases (in addition to the 60-culture Probability Sample Files) to use as a research sample.
 - Representative samples are also ideal for teaching because they accurately represent the variety of cultures around the world.
